

Chain of Custody Certification

Chain of Custody certification verifies that companies have an accounting system to trace the flow of wood from certified forests through a company's facilities. This accounting system must meet the requirements of a particular certification standard and allows companies to identify the proportion of wood in the end product that originated from certified sources.

Carrier Forest Products Ltd. is committed to Chain of Custody Certification. To this end, Carrier Forest Products Ltd. has implemented, and will maintain, operational controls and systems to meet requirements specified in the PEFC standard for chain of custody of forest based products, 2002:2020.

For any questions concerning the Chain of Custody please contact Carrier Forest Products Ltd.
